

PRINCE-MARK A. STEELE

43 Monk Street,
Spanish Town, St. Catherine, Jamaica
(876) 820-5761 | princesteele23@gmail.com
GitHub: [[Profile](#)] | Portfolio: [[My-Portfolio](#)]

Professional Summary

Entry-level full-stack web developer with hands-on experience building web applications using Angular, TypeScript, JavaScript, Node.js, Express.js, and MySQL. Developed a full-stack healthcare platform featuring secure user authentication, role-based access control, appointment scheduling, and media handling. Strong foundation in REST API development, responsive UI/UX design, Live Api Features, and database architecture. Eager to grow as a developer while contributing meaningful solutions. Comfortable using AI-assisted tools to support learning and problem-solving while actively reviewing and adapting code. Seeking to expand technical expertise through practical experience and continuous learning in a collaborative development environment.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS

Frontend: Angular 14

Backend: Node.js, Express.js, MySQL

Development: REST API Development, Authentication & Authorisation (JWT), Role-Based Access Control, Responsive Web Design, UI/UX Design (Dashboard Systems), File Upload Handling (Images, Audio, Video), System Architecture & Feature Planning, CRUD Functionality, Form Handling, Real-time Features (Live Chat, Appointment Booking), API Integration (Live Third-Party Services)

Tools: VS Code, Git, GitHub, Google's Anti-Gravity

Other: AI-assisted development, debugging, code review, web application development

Projects

Carewise – Full Stack Healthcare Platform | Personal Project

Angular 14, Node.js, Express.js, MySQL

- Developed a full-stack healthcare web application designed to connect patients and doctors through a secure digital platform
- Built comprehensive features including user authentication, patient and doctor portals, real-time appointment booking, and live chat texting functionality
- Implemented role-based access control and doctor verification onboarding process
- Integrated live APIs for real-time appointment scheduling and messaging systems
- Created a knowledge hub for health articles with media-supported publishing (image, audio, and video uploads)
- Designed and structured RESTful APIs and database schemas to support scalable healthcare operations
- Delivered a clean, professional UI/UX with intuitive dashboard systems for both patient and doctor users

Cropwise – AI-Powered Crop Yield Prediction & Planting Advisor | Hackathon Project (Team of 3)

Angular 14, Node.js, Python, MySQL, REST APIs

- Developed an AI-powered agricultural decision support platform that provides farmers with data-driven crop recommendations and yield predictions using real-time weather data from Open-Meteo.
- Built a full-stack application integrating Angular frontend, Node.js backend, and a Python-based AI engine to evaluate crop suitability based on environmental conditions and historical data.
- Collaborated within a small team under tight time constraints to design, develop, and deploy a functional MVP, contributing primarily to backend development, API integration, and system logic.

Development Strengths

- Able to understand, review, and adapt existing code effectively
- Comfortable working with frontend and basic backend integration
- Strong interest in UI styling, layout design, and responsive interfaces
- Quick learner through code analysis, testing, and problem-solving
- Actively developing a deeper understanding of software engineering concepts and independent coding ability

Experience

Apprentice – N&S Woodwork

Spanish Town, Jamaica | June 2022 – August 2022 | July 2023 | July 2024

- Worked under experienced professionals to learn practical skills and trade techniques
- Followed safety procedures and company guidelines during daily operations
- Assisted in preparing work environments and handling tools and materials
- Demonstrated teamwork, reliability, and a strong work ethic in hands-on tasks

Education

Level 4 completion in Web Application Development

Amber Hearts Coding Institute | FEB 2025- MAR 2026

Jonathan Grant High School

September 2018 – July 2023

CXC Subjects: English Language – Grade 2 | Information Technology – Grade 2 | Mathematics – Grade 3 | Social Studies – Grade 3

Additional Skills

Problem-solving, Teamwork and collaboration, Time management, Attention to detail, Adaptability, Communication, Willingness to learn.

Interests

Software engineering, Artificial intelligence, Web development, Business and entrepreneurship, Finance and investment, Continuous learning and research.
